TERMINATION BAR

**Item Description**
- 10’ x 1.08” x 0.087”
  - (3.1 m x 27.4 mm x 2.2 mm)

**Item Number**
- W56RAC3061

**Product Information**

**Description:**
Termination Bar is intended for attaching and sealing flashing terminations as outlined by Firestone Specifications and Details.

**Method of Application:**
1. Substrates must be free from dust, dirt, oil, water and other contaminants. Wall areas above Termination Bar must be waterproof. Install per Firestone Specifications and Details.
2. Install a continuous bead of Firestone Water Block Seal behind top of flashing.
3. Anchor bar through pre-punched holes to maintain constant compression (max. 12” o.c. (305 m)).
4. Install flat side of bar towards flashing so a reservoir is formed along the top edge for Firestone sealant.
5. Keep each 10’ (3.1 m) length of Termination Bar separated from adjoining bar by ¼” (6.3 mm).
6. Install termination bar vertically where base flashing(s) end.
7. Remove excess flashing material showing above the bottom of sealant reservoir channel.
8. Install Firestone AP Sealant into reservoir channel.

**Storage:**
Store in original unopened containers protected from the weather.

**Precautions:**
- Do not use as a batten strip.
- Where field cutting is necessary, remove any burrs from bar ends.
- Clean up shavings, etc. that may occur from field cutting.
- Termination bars must be installed directly to the wall surface, not to existing sheet metal, flashings, etc.
- Install termination bar on hard, smooth surfaces only. Do not install on substrates where seal is lost at mortar joints, etc.
- Do not install termination bar to wood or other porous surfaces.

**LEED® Information:**
- Post-Consumer Recycled Content: 0%
- Post Industrial Recycled Content: 67%
- Manufacturing Location: Cleveland, OH

*NOTE: LEED® is a registered trademark of the U.S. Green Building Council.

**Packaging**
- Tube: 50 – 10’ (3.05 m) pieces per tube
- Weight: 86 lb (39 kg) per tube

**Typical Properties**
